Languages

English – FCE
Spanish – Mothertongue
Catalan – Mothertongue

Summary

I am a junior .NET developer reinventing myself, as I previously studied Biotechnology and a Master in Molecular Biotechnology.

1 year ago I decided that I wanted to embark in a new adventure and shift careers. For 3 years I was coding in C# for fun and I saw that I wanted to learn more about programming and Software Development. Since then, I have finished a .NET developer bootcamp and ready to test myself in a junior position.

Check my portfolio to see my projects and their github repositories.

Skill Highlights

- C# and Python
- .Net Framework
- ASP.NET Core
- Angular 8 and Js
- Azure Cloud
- Selenium

Experience

Public Health Technician *(3 years)*
Dipsalut, Girona
- Visiting clients and ensure the overall security of the facility.
- Gather samples and analyze them.
- Documentation.

Lab technician substitution *(4 months)*
Idibaps, Barcelona
- Assist on the daily needs in a Laboratory environment.
- Perform experiments and molecular techniques

Research scientist internship *(1 year)*
Idibaps, Barcelona
- Master thesis on cellular signaling.
  Supervision:
  Dr.Carles Enrich and DR. Carles rentero
- Perform a wide range of techniques and lead my own research.

Education

.Net Bootcamp –ITAcademy 2020
FP Multiplatform App Development – UOC 2020
Master in Molecular Biotechnology - Universitat de Barcelona - 2017
Biotechnology Degree- Universitat de Girona - 2016
